

Well Control Experience

As Industry leaders in firefighting and well control, Wild Well leads the response in taking on and solving the most challenging oil and gas incidents. Whenever the integrity of the wellbore or operations are in jeopardy, our people rise to the challenge. We have capped hundreds of wells in a range of environments and performed specialized capping operations under extreme conditions. The extensive experience of Wild Well provides the capability and expertise to respond to any pressure control incident with an engineered solution.

Emergency Response Services

- Firefighting & Well Control
- Well Control Engineering
- Pressure Control

Non-Emergency Services

- Well Modeling
- Advanced Engineering
- Well Integrity Services
- Relief Well Planning
- Cementing Solutions
- Well Control Training
- Risk Assessment/Analysis
- Emergency Response Planning
- Well Control Equipment Surveys

2015 Well Control Jobs	No. of Jobs	Onshore	Offshore	North America	International
Surface Blowout with Fire	3	2	1	3	0
